REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance (taken directly from the Office action mailed 7/1/05):

Applicant has amended claim 1 to denote, inter alia, that "the curve recognition system uses a minutia and a sequence of several points on the fingerprint ridge selected so that chords connecting the adjacent measure points are of equal length, the shape of the fingerprint ridge is characterized by data of lengths of chords between a starting measure point and an ending measure point for every 3 consecutive measure points on the ridge." (emphasis added)

Neither Jain (US6,487,306) nor any of the other cited prior art discloses or suggests the above limitation of selecting chords of equal length connecting adjacent measuring points on a fingerprint ridge, and then using the data pertaining to the lengths of chords connecting every 3 consecutive measuring points to characterize the fingerprint ridge. Such a construction is illustrated in figure 1 of the present application, wherein chords connecting adjacent measure points are of equal length – i.e. chords 41, 42, 43, and 44 are equal in length – and chords connecting every 3 consecutive measure points together are used to characterize the shape of the ridge – i.e. chords 51, 52, and 53 are used to characterize the shape of the ridge.

For this reason, claim 1 and all claims dependent therefrom are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
